

AquaSmarter™
A Submersible 'Water Conditioning' Capsule

Swimming Pools, Spas and Fountains

The Easiest, Safest and Healthiest Alternative to Using Chemicals

How the AquaSmarter System Works...

Precisely measured amounts of **Pure-Silver; Copper; Zinc, Palladium** and **Carbon** as a catalyst or booster are blended together, extruded into thin wiring and coiled to create an Electro-Galvanic Process.

When the AquaSmarter Ionizing Capsule is submersed in water, the minerals begin to slowly deteriorate to produce “ionization” or positively charged sub-atomic particles. These positively charged ions which after a period of 2-weeks, completely permeate the pool and seek out to neutralize 100% of all types of *algae, bacteria and most hazardous viruses.*

A Message from our Customer...

"I have the pleasure of telling you about the condition of our Hotel swimming pool. You should see how AquaSmarter has improved the quality of the water which is now crystalline, transparent and with a slight tint between blue and a very beautiful baby blue. Thank you for your product." Hotel Piedras y Olas

AquaSmarter™

A Submersible 'Water Conditioning' Capsule

and...

We use a AquaSmarter Ionizer in every one of our water features. We love AquaSmarter product and have seen tremendous results as far as maintenance for our customers who have free standing, self-contained water features...

AquaSmarter™

A Submersible 'Water Conditioning' Capsule

and...

"We have used AquaSmarter in our Jacuzzi for the past 12 months and have found AquaSmarter to be a fantastic product. Previously, we had been using the recommended amount of chlorine but found that it irritated our skin and the smell sometimes was unpleasant. With AquaSmarter, we only need a small amount of chlorine, no other chemicals and the tub is crystal clear. The best aspect of the product for me is that it's maintenance free, (put it in and forget it for a year). I'm sure that everybody, once they've used it would prefer to use AquaSmarter rather than continue using chemicals." Thank you, Garrie McKinnon

AquaSmarter™

A Submersible 'Water Conditioning' Capsule

This is what AquaSmarter™ can do...

- Water Sample taken from Lake Apopka, Florida.
- **1st Day**

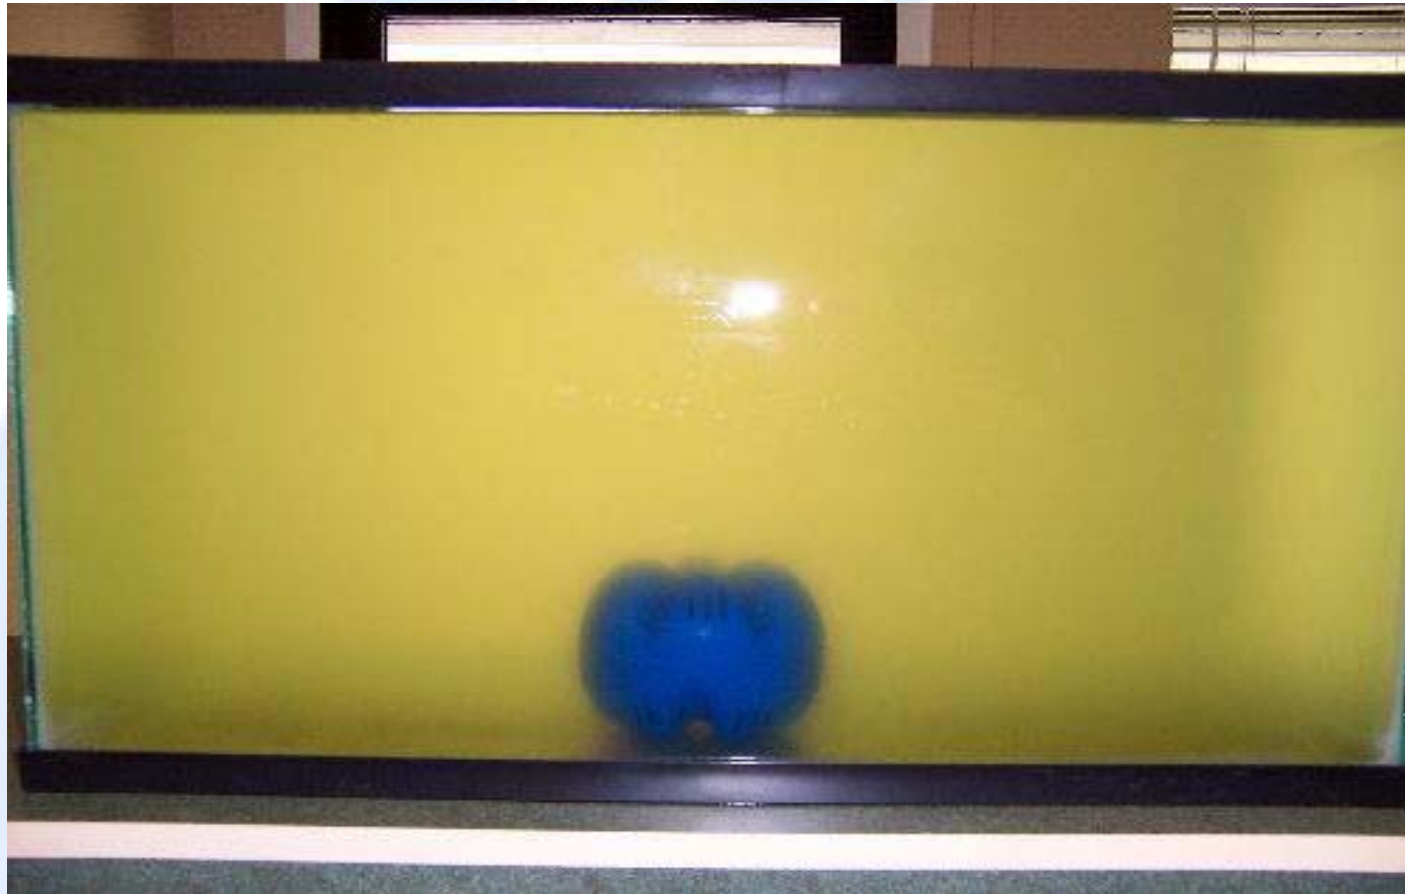

AquaSmarter™

A Submersible 'Water Conditioning' Capsule

Look at the Difference...

- Same water Sample, **24 hours later**

AquaSmarter™

A Submersible 'Water Conditioning' Capsule

Wow!!!

- 36 hours later: *Crystal Clear Water*

How to Use AquaSmarter™

For Pools and Spas:

1. For Pools, Close bottom drainage off by 50% or more and leave the skimmers on to provide the maximum amount of skimmer suction.
2. Adjust the pool jets downwards at a 45° angle and to the right to create circulation in a counter clockwise motion.
3. Place the AquaSmarter Time Released "IONIZING" Capsule into the leaf skimmer basket, holding tank, or custom system.

Ionization Saturation Time:

After installing **AquaSmarter™** in your Swimming Pool or Spa, follow this adjustment period until the water gets saturated by **AquaSmarter™** ionization:

First Two Weeks:	Normal Amount of Chlorine
Third Week:	50% less Chlorine
Fourth Week:	25% less Chlorine
Fifth Week:	12.5% less Chlorine

The recommended chlorine residual is 0.5 for residential pools and 1.0 for commercial pools.

Always maintain pH between 6.8 and 7.2 for ambient temperature water or between 7.4 and 7.6 for heated water.
